

Defense Decision Support Overview

SYNOPSIS:

Lashunda Lewis

The DDSC focuses on the concepts related to understanding Decision Support and the transforming roles of staff officers. The course overview defines Decision Support, introduces a Decision Support Model, and describes various analysis tools and techniques (both qualitative and quantitative). The goals of the Defense Decision Support Course are:

1. Develop awareness and enhance current skills in using decision support techniques
2. Understand the impact of interpersonal skills on decision support roles
3. Broaden awareness of financial management tools that enhance decision support
4. Comprehend decision support concepts and the impact on senior leaders
5. Enable an appreciation of how to utilize decision support processes in their organization
