

## Cost Estimating Unmanned Aerial Vehicles

### SYNOPSIS:

***Charlie Kapaku*, MCR, LLC and member Global Hawk Program Office, WPAFB, OH**

Want to better understand the challenges in putting together cost information on new technology? Want to understand lessons learned in this kind of ground breaking arena?

Join Mr. Kapaku for real nitty-gritty stories, examples and real lessons learned from his experiences across a wide variety of major acquisition programs to include aircraft systems such as the Joint Surveillance Target Attack Radar System (JSTARS) and the F-22 Raptor; space systems such as the Global Positioning System (GPS); electronic systems including the Joint Services Imagery Processing System (JSIPS) and Cheyenne Mountain Upgrade; and major automated information systems to include the Logistics Modernization Systems (LMS) and the Joint Ammunition Management Standard System (JAMSS). You will learn a few tricks of the trade.
